

COP 26 GLASGOW

Zero Carbon Glasgow

A half day workshop, with expert briefings, appearances by city leaders, discussion, with break-out sessions to follow to identify potential research opportunities for Strathclyde academics to work wider partners

This event aims to:

- Raise the international profile of Glasgow's Zero Carbon aspirations
- Provide a first opportunity to explain Glasgow's Zero Carbon strategy (assuming a first version is available by COP26)
- Engage key stakeholders in developing and delivering Glasgow's Zero Carbon strategy
- Create relationships that facilitate future research, KE, and teaching initiatives and proposals in relation to Zero Carbon cities in the UK and internationally
- Develop understanding and engagement for Strathclyde academics (and our partners) in relation to Zero Carbon Glasgow and zero carbon cities more generally
- Increase the wider profile and understanding of Strathclyde capability in relation to zero carbon cities

Contributions welcomed:

If you feel able to make a contribution to this workshop, we would be delighted to hear from you. It will appeal to:

- Policymakers and planners – at national and municipal level
- Public and commercial private providers of critical urban systems and services (energy, transport, communications, construction)
- Environmental NGOs
- Investors
- Academics (Strathclyde, international, and others) – in relevant disciplines (eg engineering, environmental sciences, policy, economics, social sciences, urban design)
- Consultancy companies
- Glasgow communities and citizens

Contact Richard Bellingham for further details.
